

Sovereign® Mini LED Downlight

A high quality miniature LED downlight designed and produced in the UK as a realistic replacement for existing MR16 Halogen units. Incorporating the latest Bridgelux ES Star Gen3 LED array with passive heat-sink technology with the neutral white version providing a genuine "as installed" 73 lm/W. High quality aluminium components used throughout for optimum heat dissipation and minimal weight. Aluminium bezel designed to minimise glare, with optional dark light version also available. Supplied complete with high efficiency LED driver for optimum performance and longevity. Available in choice of Warm White or Neutral White colour temperatures. Suitable for ceiling cut-out from 60mm – 85mm making these units ideal for retrofit applications. Bezel finish white as standard, with other BS/RAL colours to order.

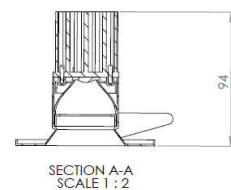

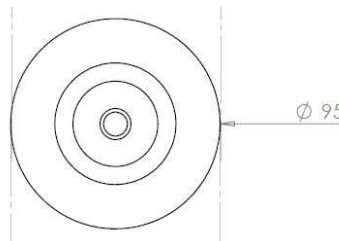

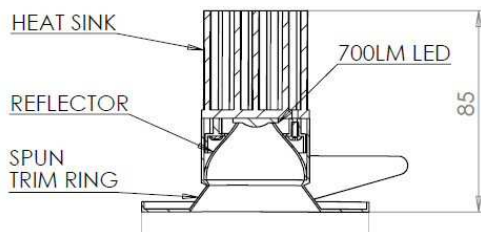

Darklight Version
