

MULTI-HEAD FRAME PENDANTS

Designed for use in larger applications such as double height car showrooms and retail sheds, the multi-head frame range utilises large box section aluminium extrusion with mitred and welded corners which support the large spun aluminium lamp housings. High purity, spun aluminium reflector systems ensure optimum performance and are available in narrow, medium & wide beam distribution. Electronic control gear supplied as standard with mains connection at a central point for ease of installation and maintenance. Supplied complete with adjustable 3mtr wire suspension sets.

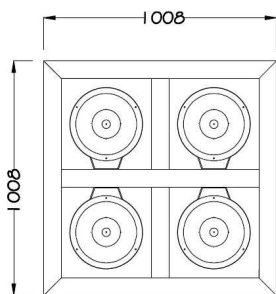

MULTI-HEAD FRAME PENDANT
